Electronic bill payment

CBILL is an Electronic bill payment and presentment service for bills and pagoPA

Multichannel mode

Customers can pay via Home Banking, ATM, mobile banking and bank branches

Significant numbers*

- ~ 195 mln operations
- ~ 180 Private Biller
- ~ 21.000 Public Entities
- ~ 11 mln active users

**From the launch of the service to 06/2023*

Open Banking ecosystem

International Open Banking platform that facilitates the interconnection among PSPs (ASPSPs and TPPs) via RegTech APIs

CBI Globe Active Functionality

TPP Enabler solution which allows Intermediaries to act as a “third party” reaching the Open Banking interfaces both at a national and international level

Key numbers*

~80% of Italian market
~250 PSP in role of TPP
~500mln calls processed
~100% of domestic current account

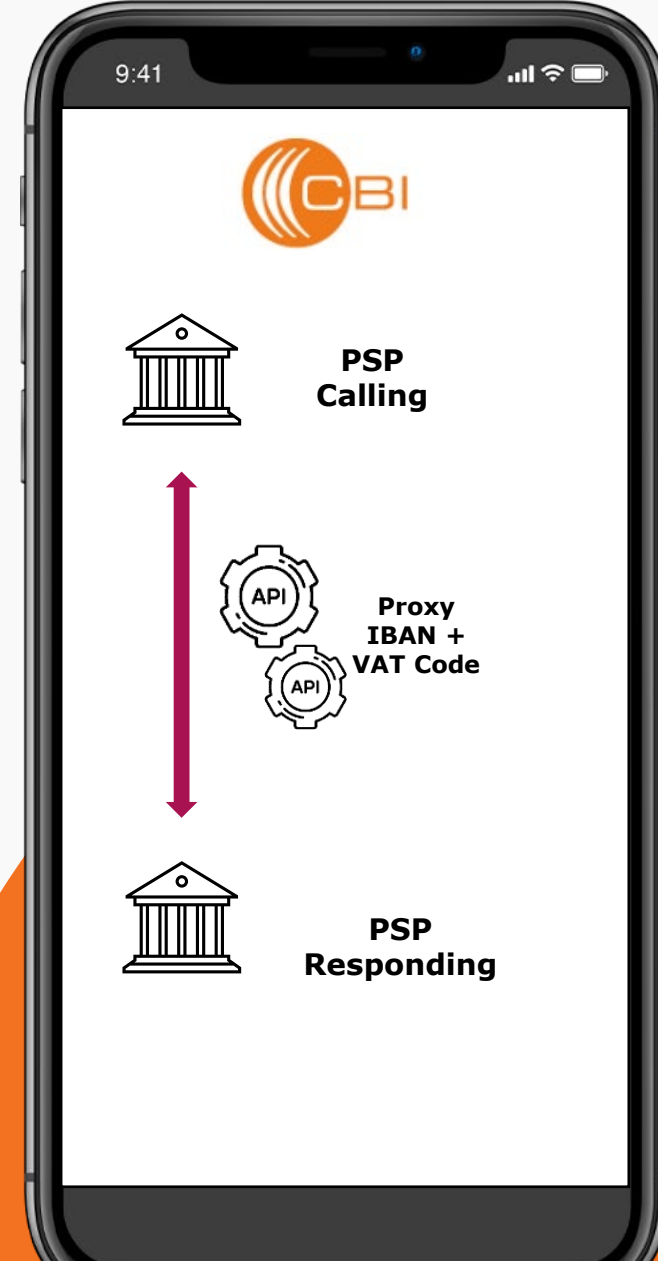

The **CBI Globe ecosystem** is composed of Value Added Services which support PSPs to offer cutting-edge services and products to their customers

Value-added Services

Check IBAN Cross Border

Real-time checks via APIs based on a proxy «IBAN code + VAT code/fiscal code» that enables domestic and international checks

Value-added Services

CBI GO

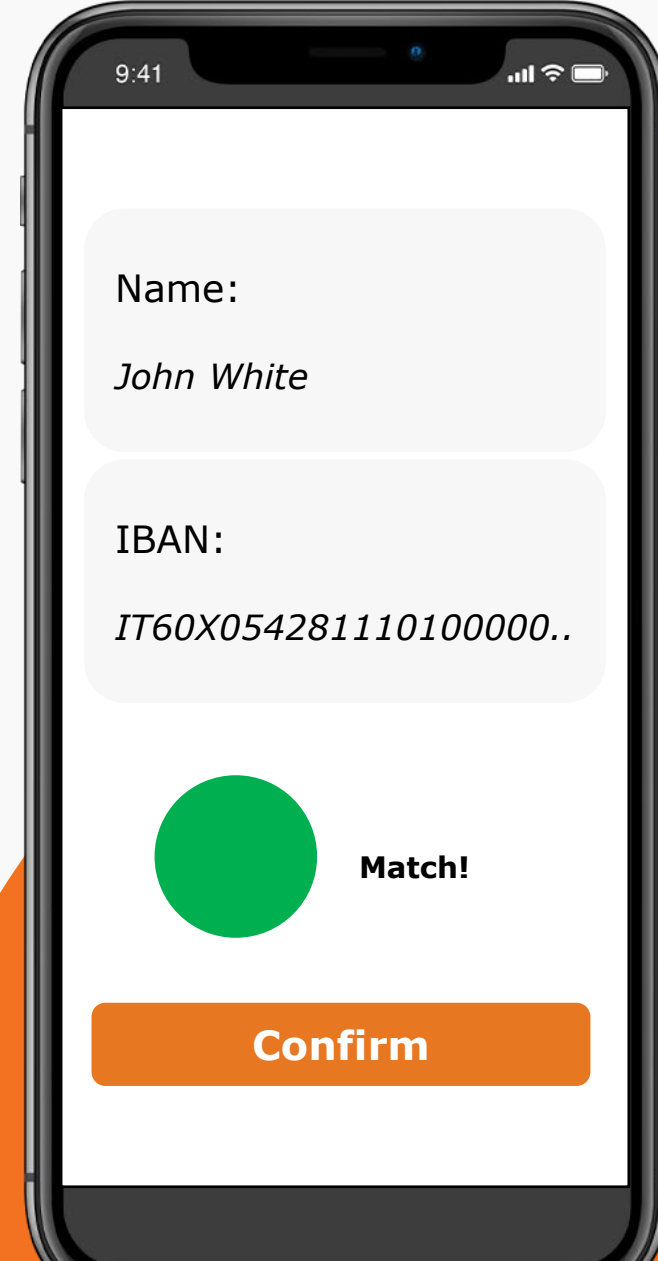

With CBI GO, PSPs can offer to Corporates a new fast and secure onboarding service for their users. The service retrieves the clients' banking data directly from the bank which has direct relationship with the final user

Value-added Services

Name Check

The service enables real-time verification via API of the correct association between an IBAN code and the user/company name associated with that code

Value-added Services

CBI Safe Trade

The service creates a Database that collects information on advance invoices from a multi-bank and multi-channel perspective to verify that the invoice has not yet been submitted or presented.
